BACKGROUND

The March 19, 2019 workshop is being held in compliance with WR 2017-0134 to receive a progress update on the SSMP.

On November 7, 2017, the State Water Board adopted Order WR 2017-0134 amending revised Order WR 2002-0013 to incorporate additional conditions that set forth specific restoration milestones to address public health and environmental concerns. WR 2017-0134 requires that the Board hold a public meeting no later than March 31 of each year during phase 1 of the SSMP to receive oral and written comment on the status of Salton Sea restoration. The order also requires a report from state agencies, due in the first quarter of 2019, to identify: (i) completed projects and milestones achieved in the prior year; (ii) amount of acreage of completed projects that provide dust suppression and habitat restoration, broken down by habitat type; (iii) upcoming projects to be completed and milestones to be achieved prior to the next annual progress report; (iv) the status of financial resources and permits that have not been secured for future projects; (v) any anticipated departures from the dates and acreages identified in condition 24 of the order, and; (vi) progress toward development of the long-range plan described in condition 26 of the order.
